

restrooms Alternative to Traditional Remodel

Convenience, Quality & Savings

This program offers a flexible, tenant friendly and cost-effective restoration alternative to replacement of the 8 most common hard surfaces (*entrance, walls, floors, counters, fixtures, partitions, ceilings & mirrors*) found in commercial restrooms. Clients select repair and restoration services for areas needing the greatest attention. The result is an itemized estimate that best fits your priorities and budget.

A schedule is then created that allows restrooms to stay open and available for use during normal hours of operation, with work typically occurring after hours. Each day, at the same time, our quality control person will visit the site and evaluate progress to insure we are on schedule and providing the best quality of work possible. Our client knows in advance when QC will occur and is always welcome to participate in these daily inspections. A daily progress report with key areas of interest and recommendations is then copied to our project team leader, the client and our RETROPROS management team. This eliminates surprises and supports a pro-active approach to completing the project as efficiently as possible. Once the project is complete, we will provide a recommended maintenance specification and ongoing support to help insure maximum appearance retention.

Our Process

INTERVIEW

Reason, expectation & guidelines

SURVEY

Evaluate 8 key Visual Impact Points (VIPs).

SOLUTION

Greatest improvement with max ROI.

PROPOSAL

Refine based on client selections.

PLAN

Prioritized schedule approved by client.

PROGRESS

Work continues as per plan and schedule.

MANAGEMENT

Daily quality control and progress reports.

COMPLETION

Client satisfaction and continued support.
